

Course Duplicates

November 2008

Some courses at the University cover substantially the same subject matter. If a pair of courses considered to be duplicates is taken, only one of them can be used to fulfill *any* requirement of a McCormick degree or certificate.

Duplicates are not alternatives from which to choose. If courses A and B are listed as duplicates and a student is required to take course A but instead takes course B, then that student will nevertheless be held to the requirement of course A. Course B cannot in such a case even be used to fulfill one of the unrestricted elective requirements.

Direct any questions about course duplicates to the Academic Services Office, Tech L269.

The following are the sets of course duplicates. An “&” indicates that the courses are duplicates of each other. A course can be a duplicate of a combination of courses, in which case the combination is indicated with courses linked by “and”.
